YATES CENTER, KS 66783

Type: ROUTINE INSPECTION
Date: Dec-29-2010

2.75 (a) (1) (vi)

RECORDS: DEALERS AND EXHIBITORS.

(a)(1) Each dealer, other than operators of auction sales and brokers to whom animals are consigned, and each exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning each dog or cat purchased or otherwise acquired, owned, held, or otherwise in his or her possession or under his or her control, or which is transported, euthanized, sold, or otherwise disposed of by that dealer or exhibitor. The records shall include any offspring born of any animal while in his or her possession or under his or her control.

(vi) The official USDA tag number or tattoo assigned to a dog or cat under Sec. Sec. 2.50 and 2.54.

* Microchip #'s are missing from 62 dogs on the dog on hand sheets. When the dog on hand sheets are not complete, it makes tracing all dogs not listed on the dog on hand sheets very hard to do. Records provide a source of information that can be used to identify every dog on the premise. USDA regulations require that a complete listing of all dogs on the premise shall be maintained at all times & be made available at the request of any USDA official. Correct by 1/29/11.

3.1 (f)

HOUSING FACILITIES, GENERAL.

(f) Drainage and waste disposal. Housing facility operators must provide for regular and frequent collection, removal, and disposal of animal and food wastes, bedding, debris, garbage, water, other fluids and wastes, and dead animals, in a manner that minimizes contamination and disease risks.

* Plastic pipe that is used to collect animal waste has broken & is allowing animal waste to collect on the ground on the west side of the double decker building. Animal waste collecting next to the dogs creates unsanitary conditions & could lead to potential disease or health risks for the dogs. The potential for increased insect & pest infestation exists when animal waste is not removed in a timely manner but allowed to buildup next to the dogs. Plastic pipes need to be repaired so that animal waste does not collect on the ground. Correct by 1/29/11.

Inspection Report

3.6 (a) (2) (ii)

PRIMARY ENCLOSURES.

(a) General requirements.

(2) Primary enclosures must be constructed and maintained so that they:

(ii) Protect the dogs and cats from injury.

* North double decker building north side attached runs to the building top run. There is a 1 to 3 inch gap between the enclosure fencing & building wall that could cause potential injury if the dog gets caught in the gap. Measures need to be taken to secure the enclosure so that no gaps exist in the enclosure affecting 20 dogs. Correct by 1/29/11.

* South double decker building bottom row divider fencing is bowing to the point the potential for injury to occur if the dog is able to gain access to dogs in the adjacent enclosure. The fencing bows from dogs jumping on to the divider fencing. Licensee needs to secure all fencing so that no fencing will bow affecting 10 dogs. Correct by 1/29/11.

* An exit briefing was conducted with the licensee.

YATES CENTER, KS 66783

2.40 (b) (3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

- (b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:
(3) Daily observation of all animals to assess their health and well-being;

Dogs need to be observed daily to assess their health. Dogs with Chip #056585084 & 100781084 need to have the mats, long hair, removed or combed out around the mouth, anal area, and areas that hang down and drag the wire flooring. Mats can cause sore and hot spots that can cause infection and discomfort, also matted hair loses the warmth insulation that dog needs during winter months. Affects 2 dogs. Correct by 01-05-2010

3.11 (c)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

- (c) Housekeeping for premises to facilitate the husbandry practices required in this subpart, and to reduce or eliminate breeding and living areas for rodents and other pests and vermin. Premises must be kept free of accumulations of trash, junk, waste products, and discarded matter. cleaning of the premises and pest control, and to protect the health and well-being of the animals.

Inside housing needs the wall kept clean to help the facility remain disease free. Trash, and discarded matter inside of housing facilities also is a place that can harbor mice. Need to clean the inside of the shelter housing and also the indoor housing buildings to better insure that dogs can remain healthy and disease free. Affects at least 50 dogs. 03-03-2010

Type: ROUTINE INSPECTION
Date: Jan-16-2009

3.4 (b) (4)

OUTDOOR HOUSING FACILITIES.

Sec. 3.4(b)(4) Outdoor housing facilities.

(b) Shelter from the elements. Shelters in outdoor facilities for dogs or cats must contain a roof, four sides, and a floor, and must:

(4) Contain clean, dry, bedding material if the ambient temperature is below 50 [deg]F (10 [deg]C). Additional clean, dry bedding is required when the temperature is 35 [deg]F (1.7 [deg]C) or lower.

Outdoor shelters must have Additional dry bedding when temp is 35 deg or lower. Present temp is 16; need to add additional bedding to the terrier pen, north end of the west slab pen. Affects 3 dogs. Correct today 01-16-09

3.6 (a) (2) (i)

PRIMARY ENCLOSURES.

Sec. 3.6(a)(2)(i)(ii) Primary enclosures.

Primary enclosures for dogs and cats must meet the following minimum requirements:

(a) General requirements. (1) Primary enclosures must be designed and constructed of suitable materials so that they are structurally sound. The primary enclosures must be kept in good repair.

(2) Primary enclosures must be constructed and maintained so that they:

- (i) Have no sharp points or edges that could injure the dogs and cats;
- (ii) Protect the dogs and cats from injury;

Primary enclosures must be kept in good repair to protect dogs from injury. Need to repair the wire enclosures of at least the 4 pens on top of the main kennel on the south side from the east when wire has broke leaving points of wire exposed to dogs, also the is a structural problem. Affects at least 11 dogs.
